Marko Velimirović (22)

Backend / Full-Stack Engineer

Novi Sad, Serbia · +381 63 810 72 45 · velimirovitsh@gmail.com · velimirovic.github.io · github.com/velimirovic · linkedin.com/in/velimirovic

SUMMARY

Backend-leaning full-stack engineer with a B.Sc. in Electrical & Computer Engineering from the Faculty of Technical Sciences, Novi Sad, currently pursuing an M.Sc. in Computer Science & Automation. Builds distributed systems in C#, Java, Go, Node.js and Python - the thesis project runs as five containerised microservices in three languages behind one API gateway. Seeking a junior engineering role.

TECHNICAL SKILLS

Languages: C#, Java, Go, Python, TypeScript, C++, SQL

Backend: ASP.NET Core 9, Spring Boot, Node.js / Express, FastAPI, EF Core, REST, gRPC, SignalR, JWT

Frontend: Angular 16-21, React 18/19, RxJS, SCSS, PWA

Databases: PostgreSQL, MySQL, MongoDB, Neo4j, Redis

Infrastructure: Docker, Docker Compose, RabbitMQ, YARP gateway, GitHub Actions, Git

AI integration: OpenAI API (GPT-4o mini), Claude API, prompt design, output validation, caching and rate limiting

AI tools: Claude Code (daily), GitHub Copilot in VS Code, Cursor, Perplexity

Practices: Microservices, modular monolith, Clean Architecture, MVC/MVVM, xUnit, Jest, pytest, Prometheus, Grafana

EXPERIENCE

Web Intern · Synechron · October 2026 - December 2026

React · TypeScript · Java Spring Boot · MySQL · MongoDB · Rancher Desktop · Kafka · Microservices

PROJECTS

Shelvio - Microservice platform with AI recommendations *B.Sc. thesis · 2026*

ASP.NET Core 9 · Node.js · Python / FastAPI · Angular 21 · PostgreSQL · Redis · RabbitMQ · Docker Compose · GPT-4o mini · github.com/velimirovic/shelvio

- 5 independently deployable services in 3 languages behind one ASP.NET Core / YARP gateway handling routing and JWT validation; each service owns its store across 2 PostgreSQL databases, Redis and RabbitMQ. Tests in 3 toolchains; entire stack starts with `docker compose up`.
- Recommendation pipeline: library tiered by rating, prompted to GPT-4o mini, output filtered against owned titles; spend capped with a 12-hour Redis cache and a per-user daily limit.

Travel Vista - Tour platform with real-time tracking *team project · 2025*

ASP.NET Core 8 · Angular 16 · PostgreSQL · SignalR · Leaflet · OpenAI API · github.com/kzi-nastava/psw-be-ra-2025-group-3

- Implemented live GPS tracking over SignalR, streaming participant positions onto Leaflet maps during a tour. Built as a modular monolith on Clean Architecture with enforced module boundaries, working across the backend and the frontend in a team.

Nine further projects - a geo-tagged video platform with an ETL pipeline and Grafana dashboards, a conference PWA with a Claude API assistant, a marketplace with live auctions, a WPF desktop app, two Unity games and two OpenGL renderers in C++ - at velimirovic.github.io.

EDUCATION

Faculty of Technical Sciences, University of Novi Sad 2026 - Present

M.Sc. Computer Science & Automation (E2) · 1st year

Faculty of Technical Sciences, University of Novi Sad 10/2022 - 09/2026

B.Sc. Electrical & Computer Engineering · Computing and Automation · Thesis: Shelvio (mentor dr Miroslav Zarić)

Electrical Engineering School "Mihajlo Pupin", Novi Sad 09/2018 - 06/2022

IT Technician

LANGUAGES & ADDITIONAL

Serbian - native · English - professional working proficiency · Member of Mensa
